		- Begin Making substrates for 2027		
13	December 23-25	Full Moon		
	2027			
	January 6-8	New Moon		Capricorn (December 22 – January 19)

\* Do your own research – figure out the constellations, as there used to be 13 Constellations before the Gregorian Calendar threw everything off

*Notice – Sept means 7, Oct means 8, Nov means 9, Dec means 10. People theorize that the first Month used to be March or April – for the Spring as the birth of the New Year.*

This year, I am going to be using a pad of paper and I am going to make about 4-5 substrates per month in case I finish one, I have others to choose from. I am going to keep the substrates within the pad of drawing paper. I am going to get one that is either 11 x 14 or 16 x 20. I am going to be using a gel plate to make the substrates. I may buy a 12 x 16 gel plate or if I can't get that size immediately, I will use the 8 x 10 one I have and double the print. This is just to create an abstract substrate in which to have inspiration each month and to draw down the energies.

Another way to do this would be to use colored tissue paper and glue or simply to use watercolor abstractly for each substrate.

Use the zodiac signs for inspiration if you wish.
